

About Us:

We work with logistics companies in the US to help them digitize and streamline their operations. Founded by graduates of IIM Calcutta and Carnegie Mellon University, we specialize in building custom software applications that solve real-world business challenges in the logistics industry. Our teams work as an extension of our clients' organizations, giving us unique exposure to complex logistics workflows and the opportunity to design solutions that have a direct impact on their business success. We are completely self-funded and profitable. We are looking for passionate, energetic and hardworking individuals to join our team. If you are seeking a work environment that offers new challenges every day along with tremendous growth you are at the right place.

Our goal is to connect with bright and motivated students who are eager to kickstart their careers in software development. We are looking to fill several entry-level positions that will provide students with invaluable industry experience while contributing to our projects.

Position Overview: As a Developer- Trainee, you will assist in the development, testing, and maintenance of software applications. You will work closely with senior developers and cross-functional teams to design and implement new features while learning best practices in software development.

Key Responsibilities:

- Assist in the design, development, and testing of software applications.
- Write clean, maintainable, and efficient code.
- Participate in code reviews and testing.
- Collaborate with team members to troubleshoot and resolve software issues.
- Contribute to documentation and user guides for applications.
- Stay updated on emerging technologies and industry trends.

Qualifications:

- Bachelor's degree in Computer Science, Information Technology or a related field (or equivalent experience).
- Understanding of at least one programming language (e.g. Java, Python, JavaScript).
- Basic understanding of web development technologies (HTML, CSS, JavaScript).
- Familiarity with version control systems (e.g., Git).
- Strong analytical skills, problem-solving skills and attention to detail.
- Excellent communication and teamwork abilities.
- Eagerness to learn and adapt to new technologies.

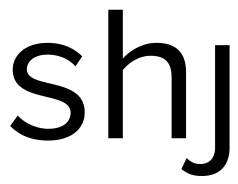

Preferred Skills:
